Spanish – Native

English – Conversational

Summary

Hi, I'm Luis Laguna, a Software Developer who loves technologies such as Js, React, Nodejs, Angular, and PHP, so basically, web development.

Since I was a child I've loved how things work, usually ending up in complex situations just to find out how that specific thing works, that "ability" has given me a lot of problems but in some other situations it could be said that it has been an advantage such as this case since I'm constantly learning how to do things and not only that but how it works too, so I can have better hindsight of the situation and the problem I need to resolve after all if I don't know how to resolve a problem how am I supposed to become a good developer?

Skill Highlights

- JavaScript
- React.js
- Next.js
- Adaptation to new challenges
- Node.js
- Express.js
- CSS/HTML/Git
- Willingness and quickness to learn.

Experience

E-Commerce Website

Website created with React, NextJs, y NodeJs. It is an E-Commerce with all functionality such as admin panel to create, edit or delete any product, admin or category, each product has own stock, and the website has a shopping cart, status of the package and wishlist.

Tecnologies:

REACT | NEXTJS | CSS | JAVASCRIPT | NODEJS | MONGODB | EXPRESS | CONTEXT | REDUCER

CRUD Products

Website created with React, Redux and Firebase. It's a CRUD to practice and learn technologies like Redux, Firebase, Formik and Axios.

Tecnologies:

REACT | REDUX | CSS | JAVASCRIPT | FIREBASE | AXIOS | FORMIK

Education

My education in this area is self-taught, thanks to some courses in platforms like Udemy, I could learn enough to make my own projects and start learning from the documentations without the need of an instructor, nonetheless I still have a lot to learn but I'm proud of myself because I feel like every day I learn something
